4. The following is an examiner's statement of reasons for allowance:

The prior arts of recorded and the newly cited arts teach a method and system for scheduling tasks based upon the forecast probabilities of availability of a plurality of resources. However, they are fail to teach or suggest that the forecast probabilities of availability of a plurality of resources are determined base upon the determining probability of availability of each resource including the steps of determining an amount of time that a resource has already spent servicing the task, determining a first probability of completion of the servicing of the task by the resource in a future point in time without consideration of the amount of time that the resource has already spent servicing the task, determining a second probability that the resource has not completed

servicing the task within the amount of time that the resource has already spent servicing the task, determining from the first and the second probability a third probability of completion of completion of the servicing task by the resource by the future point in time considering the amount of time the resource has already spent servicing the task.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
